B. ADDITIONAL INFORMATION REQUIRED BY BURSA MALAYSIA LISTING REQUIREMENTS

B1. Review of Performance

In response to the detrimental pricing dynamics and headwinds plaguing the steel and coke industry in year 2016, the Group had taken a proactive step to mitigate the anticipated losses and therefore had decided to temporarily lease out its operationalised coke ovens during those trying period. Notwithstanding the above however, the Group has since taken back the coke manufacturing operations from February 2017 onwards following the expiry of the lease tenure in January 2017.

For the current quarter under review, the Group recorded a consolidated revenue of RM86.7 million compared to RM41.9 million registered in the preceding year corresponding quarter. As the lease period was from February 2016 to January 2017, the revenue recorded during the quarter under review was derived from only two months period whereas the corresponding quarter in the preceding year only covered one month period in 2016. The average coke price improved significantly from RMB680 per tonne in January 2016 to RMB1,854 per tonne recorded in the first quarter of 2017 with a drop in the sales volume of approximately 13%. The contribution from the by-products accounted for approximately 7% of the total revenue compared to 24% in the preceding year corresponding quarter as the Group is still slowly ramping up its production to increase its by-products during the quarter under review.

With the resumption of operation during the quarter under review, the Group has recorded a cost of sales amounting to RM83.8 million compared to RM56.2 million in the same quarter last year. The Group saw a marginal increase in the cost of coking coal with the average price increased from RMB561 per tonne in previous year corresponding quarter to RMB1,235 per tonne in the quarter under review. Such pricing dynamics have resulted in the Group reversing its gross loss of approximately RM14.3 million in the previous year corresponding quarter to recording a gross profit of approximately RM2.9 million in the current quarter under review.

The other income includes the lease income received from the abovementioned leasing arrangement for both the current quarter under review and the corresponding quarter in the preceding year.

The operating expenses incurred by the Group has increased from RM1.4 million in previous year corresponding quarter to approximately RM5.7 million in the current quarter under review. The operating expense for the current quarter under review includes staff salary, depreciation, minor repair and maintenance, electricity and etc. As a result thereof, the Group recorded a net loss before tax of RM1.0 million in the current quarter under review compared to a net loss of approximately RM13.6 million in the preceding year corresponding quarter.

B2. Variation of results against preceding quarter

The consolidated revenue and cost of sales recorded by the Group during the quarter under review was approximately RM86.7 million and RM83.8 respectively. There were no revenue nor cost of sales recorded during the immediate preceding quarter ending 31 December 2016 as a result of the strategic move by the Group to lease out its operationalised coke ovens for a period of one year commencing 1 February 2016.

Notes to the quarterly report – 31 MARCH 2017

Due to the impairment of trade receivables and fixed assets during the immediate preceding quarter ended 31 December 2016, the Group recorded an operating expenses of approximately RM198.8 million compared to approximately RM5.7 million in the current quarter under review.

After taking into consideration of other income and operating expenses, we have seen significant improvements to the bottom line of the Group's financial by virtue of it registering a much lower net loss of approximately RM1.0 million for the current quarter compared to that of approximately RM194.0 million in the immediate preceding quarter ended 31 December 2016.

B3. Current year prospects

China's economy grew 6.9% in the first quarter of 2017, the fastest pace since the third quarter of 2015, according to the National Bureau of Statistics (NBS). Although prima-facie such growth rate appears to indicate that the China economy is slowly stabilizing, the International Monetary Fund (IMF), however, in its World Economic Outlook (WEO) update in January 2017 appeared to paint a relatively lesser than cheerful picture of the China economy, with an overall lower 6.0% growth estimated for the entire period of 2017.

On a micro level specific to the steel and coke industry in China, its steel mills which produce about half of the world's output, are still battling against losses. Steel demand in China is expected to slump to about 626 million tonnes in 2017 from 645 million tonnes consumed in 2016. According to a stipulation in the Thirteenth Five-Year Plan, the Chinese Government will start to reduce its domestic capacity by 100-150 million tonnes of crude steel in 5 year time. Strict prohibition of additional capacity and encouraged self-capacity reduction by steel mills, reduced capacity through various avenues such as amalgamation, mergers, transformation or relocation are amongst the various initiatives contemplated by the Chinese Government to address the issue on hand.

Further to the above, the fervor seen in recent times on the handling of environmental pollution policies by the Chinese Government is expected to further accentuate the reduction in capacity of the various industries. Going forward, state directives and environmental inspections may force some firms to improve efficiency, buck up or exit.

In view of the above, the Group maintains a cautious position and remains optimistic and vigilant to relevant consequential circumstances that affect the metallurgical coke business and that of the industry in order to stay prepared to face any challenges that come its way.

B4. Variation on Forecast Profit / Profit Guarantee

The Group did not issue any profit forecast nor profit guarantee during the current financial period to date.
